

# COVID-19 Vaccination Scheduling

This COVID-19 vaccination initiative is a collaboration led and organized by Galveston County, UTMB Health and the Galveston County Health District, with support from the state and other regional partners.

Due to limited initial supplies, the first COVID-19 vaccines are being designated for priority risk groups as defined by state and federal guidelines.

To use this portal to schedule a vaccine at this time, you must be a frontline health care worker as defined by the state (Phase 1.A); over the age of 65; or between the age of 16 and 65 with specific medical conditions that place you at greater risk from COVID-19 (Phase 1B). Proof of eligibility may be required.

*If you are currently participating in or*

*have participated in a COVID vaccine study, please do not schedule and contact your study coordinator, even if you were already notified you got the placebo.*

**Tell us about yourself to check availability and schedule:**

---

**Are you a frontline health care worker as defined in the Texas Department of State Health Services' eligibility requirements (see Phase 1A definition)?**

**YES**

**NO**
